## EXAMPLE SIGNIFICANT CONTRIBUTIONS

---

- Proposed the first system that predicts the emotional valence and arousal of music from audio signals and became one of the most influential researchers on the topic **music emotion recognition**: wrote a book (monograph) on this (CRC Press 2011); gave a tutorial in a major international conference (ISMIR 2012); won the IEEE Signal Processing Society Best Young Author Award due to a journal publication (TASLP 212); the same publication has been cited by 350+ papers thus far.
